Thanks. I'm okay for now, but may give you a call if I have more questions.

Have a great weekend - Jenny

The quick answer is that there is no EFH designated for steelhead, and Icicle Creek to the confluence of Wenatchee is part of the EFH for spring Chinook salmon. The last version of the BiOp (In Section 3) I sent to you on 4/19 has some discussion of EFH, which contains more helpful information for you.

I'd be happy to get on the phone and walk you through some of this stuff if you are interested. Are you in the office today?

Hi Emi, I'm working on the response to comments for the NPDES permit. One comment relates to EFH in the LNFH discharge. Can you let me know whether there is designated EFH in the vicinity of the LNFH discharge?

Thanks,  
Jenny
